Complete Excel, Word, and Web-Based Questionnaires

Upload questions in any format (XLS, Docx, PDF, Gsheet)

Use the 1up Browser Extension for web-based questionnaires

Connect All Your Product Knowledge in Minutes

1up pulls in your website and 3rd party data sources such as Google Drive, Confluence, and many more.

SOC2 Compliant and Built by Security Engineers

All data is encrypted at rest and in-transit.

Documents added to 1up are never used to train AI models.

 RFP Questionnaire -

Who's a contact for this questionnaire?	Tom Wambsgans, our Chief Business Officer, will be our primary contact. 
Do you have SOC2 compliance?	Yes, we received our SOC2 Type 2 certification. Here is a link. 
Do you enforce MFA?	Yes, we utilize a combination of SSO and Strong MFA for all users.

Ask 1up Directly from Slack or Microsoft Teams

Need help with a technical question? Just ask @1up

Success Stories

I absolutely love 1up and use it daily. This is the new way of working and I am NOT going back.

Pradeep Nayar
Strategic Senior Sales Engineer

I love this tool. Manually responding to complex questionnaires is a huge pain for our sales and solutions teams. We can finally automate this.

Brandon Whitman
Senior Solutions Consultant

We decline to respond to most RFPs because we don't have the capacity. With 1up's automation we can take as many opportunities as we want.

Shawn Veitz
Chief Revenue Officer

INVESTORS

FusionAuth Saw Immediate ROI

Save \$1,000 per questionnaire in employee hours

A complex 100-question RFP can take multiple teammates a combined 12 hours to complete.

Respond 90% faster

No manual writing. 1up automatically generates accurate responses with perfect grammar using sources you trust.

Replace expensive legacy RFP tools

Bulky tools require manual knowledge management. 1up automates knowledge at a fraction of the cost.

Take on more opportunities → Win more deals

Say yes to more RFPs. You're no longer limited by your team's capacity. Automate more to win more.

"We just got a 200-question RFP and needed to have it done by Friday. That short timeframe put the deal at risk. With 1up we got it done easily."

Kahlil Lewis
Sales Engineering, FusionAuth

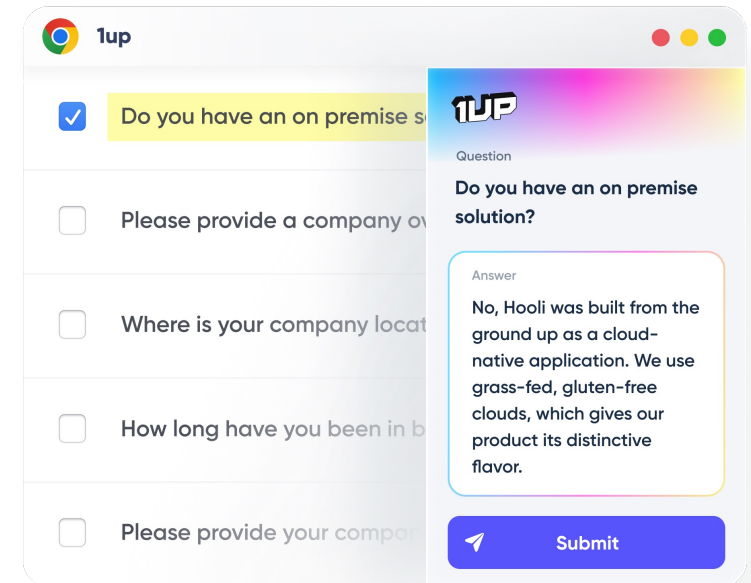

WalkMe Automated RFP Workflows

Before 1up

- RFPs and Security questionnaires take days, weeks to complete
- Slow, complex workflow involving many steps and stakeholders
- Admins spend hours reviewing and updating questions and answers
- Limited capacity to take on more opportunities

After 1up

- RFP questionnaires are completed the same day they are received
- Fast, streamlined workflow with fewer steps
- No longer maintain a library of Q&A, 1up automatically refreshes
- Increased capacity and saying yes to all opportunities they receive

A screenshot of a web browser window displaying the 1up automated RFP workflow. The browser's address bar shows the 1up logo. The main content area features a list of questions, each with a checkbox. The first question, "Do you have an on premise solution?", is highlighted in yellow and has its checkbox checked. Below it are three more questions: "Please provide a company overview", "Where is your company located?", and "How long have you been in business?", each with an unchecked checkbox. At the bottom is a question "Please provide your company contact information" with an unchecked checkbox. To the right of the questions is a sidebar with the 1up logo, the question "Do you have an on premise solution?", and a text area for the answer. The answer provided is: "No, Hooli was built from the ground up as a cloud-native application. We use grass-fed, gluten-free clouds, which gives our product its distinctive flavor." Below the answer is a blue "Submit" button with a paper plane icon.

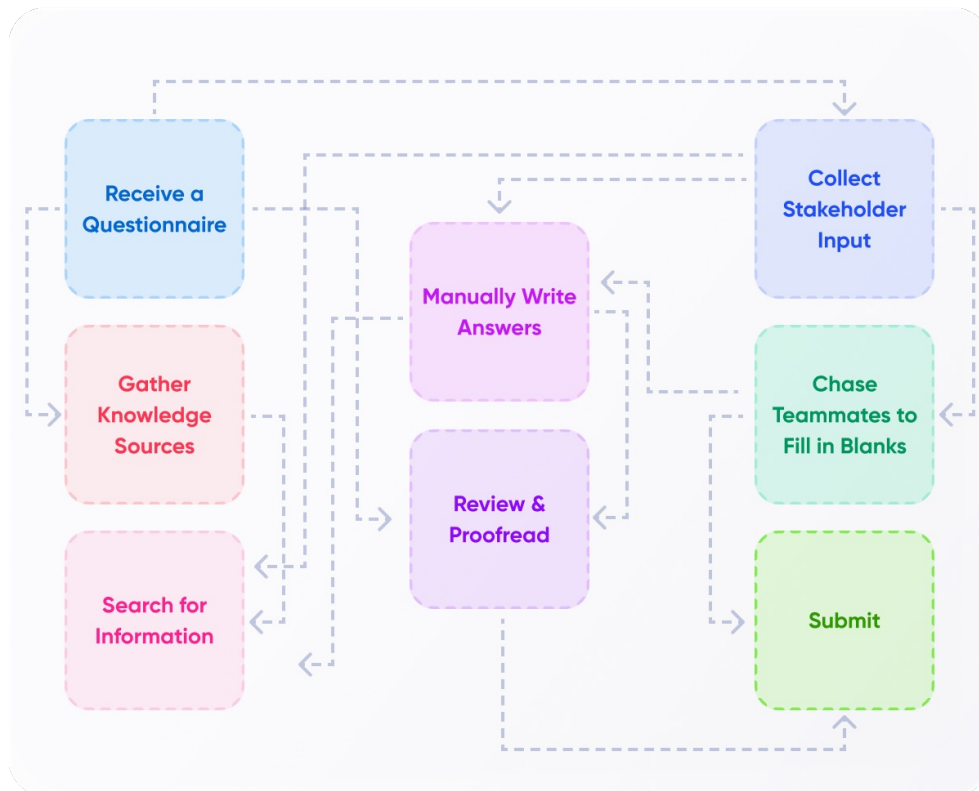

"This is just the beginning. Wait until our other departments find out about 1up."

Your Workflow Before 1up

Long, Painful Questionnaires
Take Days or Weeks to Complete

Your Workflow with 1up

Automated Questionnaires
Take Minutes/Hours to Complete

1up is Led by a Team of Seasoned Founders and Security Engineers

Before 1up, we founded HYPR, a leader in Identity Security.

While working with sales & IT teams across the globe we experienced this problem firsthand.

That's why we built 1up.
